I have a certificate in Full Stack Web Development from the University of New Hampshire, and I am currently searching for a role as a full stack software developer. Throughout the bootcamp, I gained skills in programming languages and technologies that include: HTML, CSS, Javascript, Node.js, and React.js. I am a creative problem solver, a purpose-driven learner and a collaborator. I adjust quickly to new environments and approach challenges iteratively, with ease and excitement. I am passionate about learning skills related to building anything and have fallen in love with the design process. I am really looking forward to collaborating with a team to build awesome, user-friendly applications in a full stack environment.

Skills

React.js - **Node.js** - **Javascript (ES6)** - **HTML5** - **CSS3** - **Sequelize** - **Express.js**
MongoDB - **MySQL** - **Bootstrap** - **Materialize** - **jQuery** - **Handlebars.js**

Education

Full Stack Web Development Certificate / Portsmouth, New Hampshire
12/2019 – 05/2020

A six month intensive program teaching HTML5, CSS3, JavaScript, jQuery, Node.js, MySQL, MongoDB and React.js.

- Spent eight weeks learning frontend technologies such as HTML5, CSS, jQuery and frontend CSS frameworks.
- Required to build web apps that were highly responsive and prioritize mobile first.
- Extensive material covering everything from vanilla Javascript to modern ES6 additions, including an intro to OOP using ES6 classes and constructors.
- Used GitHub extensively to submit and manage each assignment which also allowed me to collaborate effectively during team projects.
- Served as team lead for a full stack project where we built an employee feedback app called Drift.
- Gained exposure with AWS cloud by launching and connecting to an Amazon EC2 Linux instance, where I was able to create a database and deploy a simple web app.
- Built relational databases and used Sequelize to manage the mySQL database. Built REST API to manage providing data to a client from a database.
- Learned React including their new utilization of hooks and state management with the context API, reducer and context provider. This workflow helped shed light on the concepts of Redux.

Work experience

Part-Owner
Union Coffee Company | Milford, New Hampshire
07/2016 – present

I transformed a young, struggling coffee shop into a successful and financially stable coffee company. Union Coffee's mission is to provide a welcoming and inclusive environment for our local community. We are obsessed with providing an unparalleled customer experience and we currently have a five star rating on Google with over 350 reviews. Make sure to look for our coffee in your local Whole Foods!

- Drastically improved the company's financial organization to ensure accurate tracking and recording of day to day cash flow. I was also able to cut supply costs while maintaining a high quality product.
- Improved team coordination by implementing better systems for staff communication and scheduling.
- Led the company's expansion into roasting our own coffee, which required organizing a build-out in a new space and creating a new operational structure.
- Promoted and trained staff from within the company to take over day to day management of the cafe.

Coffee Director
Flight Coffee Company / Dover, New Hampshire
07/2015 – 05/2016

I had the opportunity to take part in a startup project where I designed and opened Flight Coffee's first cafe location in Dover, NH. I organized and managed the build-out of a 3,000 sq. ft. space, while also hiring and training staff. I also created the menu and was responsible for researching and sourcing vendors to fulfill the cafe's supply needs.

Other Education:

Business Management
Liberty University / Lynchburg, Virginia / 2012-2013
